

# Package api

```
import "PGL/Client/api"
```

[Overview](#)[Index](#)

## Overview ▾

Package API provides the functions required to send a request to the API server, and parse the JSON response into local variables to work with.

## Index ▾

### Constants

```
func Add(model string, jsonData interface{}) []byte
func Del(model, params string) []byte
func Edit(model, params string, jsonData interface{}) []byte
func Get(model, params string) []byte
func GetAll(model, idparam string) []byte
func ModelAllConv(data []byte, model string) (interface{}, bool)
func ModelConv(data []byte, model string) (interface{}, bool)
```

## Package files

[api.go](#) [utils.go](#)

## Constants

Base url of the APIServer

```
const baseURL = "https://localhost:8080/api/v1"
```

## func Add

```
func Add(model string, jsonData interface{}) []byte
```

Add function

## func Del

```
func Del(model, params string) []byte
```

Delete function

## func Edit

```
func Edit(model, params string, jsonData interface{}) []byte
```

Edit function

## func Get

```
func Get(model, params string) []byte
```

Get function

## func GetAll

```
func GetAll(model, idparam string) []byte
```

Get all

## func ModelAllConv

```
func ModelAllConv(data []byte, model string) (interface{}, bool)
```

Converts the JSON response to appropriate interface models to be asserted later on, for multiple responses

## func ModelConv

```
func ModelConv(data []byte, model string) (interface{}, bool)
```

Converts the JSON response to appropriate interface models to be asserted later on

Build version go1.15.7.
